## LONG DESCRIPTION:

*Explain the project in more detail. For example:*

- *What are the data that will be stored and processed?*  
User posted texts (subjects), answers (comments) given to shared texts (subjects) and those answers' votes, user information
- *What type of users will use the system?*  
Admins and regular users.
- *What will the users be able to do with the data and the application?*  
Admins to delete/regulate the texts shared, users to share texts (subjects) and answers (comments).

*Give examples of similar applications and/or web sites.*

Online forum sites, reddit
