- Install Java 1.8.
- Install Maven. You may follow the instructions given in the below link:

  http://maven.apache.org/install.html

- Extract the file attached to Class Files with name "Unit Testing Practice Session" (i.e. toltu.tar.gz). So, you will obtain six folders.
- For each folder, go inside to the folder and build it with Maven. You may use the command below to build:

  mvn clean compile –DskipTests=true

- You can take the projects to the Eclipse by following the given screenshots below.
